This ambitious, growing series addresses various aspects of the “Holocaust” of the WWII era. Most of them are based on decades of research from archives all over the world. They are heavily referenced. In contrast to most other works on this issue, the tomes of this series approach its topic with profound academic scrutiny and a critical attitude. Any Holocaust researcher ignoring this series will remain oblivious to some of the most important research in the field. These books are designed to both convince the common reader as well as academics. The following books have appeared so far, or are about to be released. **SECTION ONE: General Overviews of the Holocaust**

**The First Holocaust. The Surprising Origin of the Six-Million Figure.** By Don Heddesheimer. This compact but substantive study documents propaganda spread prior to, during and after the FIRST World War that claimed East European Jewry was on the brink of annihilation. The magic number of suffering and dying Jews was 6 million back then as well. The book details how these Jewish fundraising operations in America raised vast sums in the name of feeding suffering Polish and Russian Jews but actually funneled much of the money to Zionist and Communist groups. 5th ed., 198 pages, b&w illustrations, bibliography, index. (#6)

**Lectures on the Holocaust. Controversial Issues Cross Examined.** By Germar Rudolf. This book first explains why “the Holocaust” is an important topic, and that it is well to keep an open mind about it. It then tells how many mainstream scholars expressed doubts and subsequently fell from grace. Next, the physical traces and documents about the various claimed crime scenes and murder weapons are discussed. After that, the reliability of witness testimony is examined. Finally, the author lobbies for a free exchange of ideas about this topic. This book gives the most-comprehensive and up-to-date overview of the critical research into the Holocaust. With its dialog style, it is pleasant to read, and it can even be used as an encyclopedic compendium. 3rd ed., 596 pages, b&w illustrations, bibliography, index. (#15)

**Breaking the Spell. The Holocaust, Myth & Reality.** By Nicholas Kollerstrom. In 1941, British Intelligence analysts cracked the German “Enigma” code. Hence, in 1942 and 1943, encrypted radio communications between German concentration camps and the Berlin headquarters were decrypted. The intercepted data refutes the orthodox “Holocaust” narrative. It reveals that the Germans were desperate to reduce the death rate in their labor camps, which was caused by catastrophic typhus epidemics. Dr. Kollerstrom, a science historian, has taken these intercepts and a wide array of mostly unchallenged corroborating evidence to show that “witness statements” supporting the human gas chamber narrative clearly clash with the available scientific data. Kollerstrom concludes that the history of the Nazi “Holocaust” has been written by the victors with ulterior motives. It is distorted, exaggerated and largely wrong. With a foreword by Prof. Dr. James Fetzer. 4th ed., 261 pages, b&w ill., bibl., index. (#31)

**Debating the Holocaust. A New Look at Both Sides.** By Thomas Dalton. Mainstream historians insist that there cannot be, may not be a debate about the Holocaust. But ignoring it does not make this controversy go away. Traditional scholars admit that there was neither a budget, a plan, nor an order for the Holocaust; that the key camps have all but vanished, and so have any human remains; that material and unequivocal documentary evidence is absent; and that there are serious problems with survivor testimonies. Dalton juxtaposes the traditional Holocaust narrative with revisionist challenges and then analyzes the mainstream’s responses to them. He reveals the weak-
nesses of both sides, while declaring revisions to the winner of the current state of the debate. 2nd ed., 532 pages, b&w illustrations, bibliography, index. (#32)

The Hoar of the Twentieth Century. Two against the Presumed termination of European Jewry. By Arthur R. Butz. The first writer to analyze the entire Holocaust complex in a precise scientific manner. This book exhibits the overwhelming force of arguments accumulated by the mid-1990s. Butz’s main arguments are: 1. All major entities hostile to Germany must have known what was happening to the Jews under German authority. They acted during the war as if no mass slaughter was occurring. 2. Contemporary evidence adduced to prove any mass slaughter has a dual interpretation, while the only innocuous one can be proven to be correct. This book continues to be a major historical reference work, frequently cited by prominent personalities. This edition has numerous supplements with new information gathered over the last 33 years. 4th ed., 524 pages, b&w illustrations, bibliography, index. (#7)

Dissecting the Holocaust. The Grown-Ups Tell Their “Truth and Memory.” Edited by Germar Rudolf. Dissecting the Holocaust applies state-of-the-art scientific methodology to unique and classic methods of detection to investigate the alleged murder of millions of Jews by Germany during World War II. In 22 contributions—each of some 30 pages—the 17 authors dissect generally accepted paradigms of the “Holocaust.” It reads as exciting as a crime novel: so many lies, forgeries and deceptions by politicians, historians and scientists—proven. This is the intellectual adventure of the 21st century. Be part of it! 2nd ed. 620 pages, b&w illustrations, bibliography, index. (#1)

New Disappearance of Eastern European Jewry: By Walter N. Sanning. Six Million Jews died in the Holocaust. Sanning did not take that number at face value, but rather explored European population developments and shifts mainly caused by emigration as well as deportations and mass executions conducted by both Nazis and the Soviets, among other things. The book is based mainly on Jewish, Zionist and non-Zionist archival sources. It concludes that a sizeable share of the Jews found missing during local censuses after the end of World War II were not so far counted as “Holocaust victims,” had either emigrated (mainly to Israel or the U.S.) or had been deported by Stalin to Siberian labor camps. 2nd ed., foreword by A.R. Butz, epilogue by Germar Rudolf containing important updates; 224 pages, b&w illustrations, bibliography (#29).

Air Photo Evidence: World War Two Photos of Alleged Mass Murder Sites. By Carlo Mattogno. During World War Two both German and Allied reconnaissance aircraft took countless air photos for military and tactical and strategic interest in Europe. These photos are prime evidence for the investigation of the Holocaust. Air photos indicate locations known or alleged to be murder locations, Majdanek, Treblinka, Babi Yar etc. permit an insight into what did or did not happen there. The book contains many pertinent photos and has thoroughly analyzed them. This book is full of air photo reproductions and schematic drawings explaining them. According to the author, these images refute many of the atrocity claims made by witnesses in connection with events in the German sphere of influence. 5th edition; with a contribution by Carlo Mattogno. 198 pages, 8.5”x11”, b&w illustrations, bibliography, index (#27).

The Leuchter Reports: Critical Edition. By Fred Leuchter and Germar Rudolf. Between 1988 and 1991, U.S. expert on execution technologies Fred Leuchter wrote four reports addressing the authenticity of the Third Reich operated homicidal gas chambers. The first report on Auschwitz camp hypothesis became worldwide famous. Based on chemical analyses and various technical arguments, Leuchter concluded that the locations investigated “could not have been, or now be, utilized or seriously considered to function as execution gas chambers.” The second report deals with gas-chamber claims for the camps Dachau, Mauthausen and Hartheim, while the third reviews design criteria and operation procedures of execution gas chambers in the U.S. The fourth report reviews Pressac’s 1989 tome Außchwitz II, 252 pages, b&w illustrations. (#16)

The Giant with Feet of Clay: Raul Hilberg and His Standard Work on the Holocaust. By Thomas Kues and Carlo Mattogno. 142 pages, b&w illustrations, bibliography. (#19)

SECTION TWO: Specific non-Auschwitz Studies

Treblinka: Extermination Camp or Transit Camp? By Carlo Mattogno and Jürgen Graf. It is alleged that at Treblinka in East Poland between 700,000 and 3,000,000 persons were murdered in 1942 and 1943. The weapons used were said to have been stationary and/or mobile gas chambers, fast-acting or slow-acting, with superheated lime, unslaked lime, superheated steam, electricity, diesel exhaust fumes etc. Holocaust historians alleged that bodies were piled as high as multi-storied buildings and only for a few days, then burned without a trace, using little or no fuel at all. Graf and Mattogno have worked closely together, examined and transmitted the official version of Treblinka. On the basis of numerous documents they reveal Treblinka’s true identity as a mere transit camp. 2nd ed., 372 pages, b&w illustrations, bibliography. (#30)

Sobibor: Holocaust Propaganda and Reality. By Jürgen Graf, Thomas Kues and Carlo Mattogno. Between 25,000 and 2 million Jews are said to have been killed in gas chambers in the Sobibor camp in Poland. The corpses were allegedly buried in mass graves and later incinerated to pyres. The book investigates these claims and shows that they are based on the selective use of contradictory eyewitness statements and theoretical considerations. Although the text is not free of errors, the book is of primary importance. It also documents the general National Socialist policy toward Jews, which never included a genocidal “final solution.” 280 pages, b&w illustrations, bibliography. (#19)

The “Extermination Camps” of “Aktion Reinhard.” By Jürgen Graf, Thomas Kues and Carlo Mattogno. In late 2011, several members of the terminationist Holocaust Controversy blog posted a study online which claims to refute three of our authors’ monographs on the camps Bełżec, Sobibor and Treblinka (see previous three entries). This tome is their point-by-point response, which makes “mincemeat” out of the bloggers’ attempts at refutation. The two volumes of this work are an intellectual overkill for most people. They are recommended to all serious historians and professionals. These two books require familiarity with Holocaust literature, which makes them a comprehensive update and expansion. 2nd ed., two volumes, total of 1,396 pages, illustrations, bibliography. (#28)
Concentration Camp Maidanek: A Historical and Technical Study. By Carlo Mattogno and Jürgen Graf. At war’s end, the Soviets claimed that up to two million Jews were murdered at the Maidanek Camp in seven gas chambers. Over the decades, however, the Maidanek Museum reduced the death toll three times to currently 78,000, and admitted that there were “only” two gas chambers. By exhaustively researching primary sources, the authors expertly dissect and repudiate the myth of homicidal gas chambers at that camp. They also critically investigated the legend of mass executions of Jews in tank trenches and prove groundless. Again they have produced a standard work of methodical investigation which authentic historiography cannot ignore. 3rd ed., 358 pages, b&w illustrations, bibliography, index. (#5)

Concentration Camp Stutthof and its Function in National Socialist Jewish Policy. By Carlo Mattogno and Jürgen Graf. Orthodox historians claim that the Stutthof Camp served as a “make-shift” extermination camp in 1944. Based mainly on archival resources, this study thoroughlydebunks this view and shows that Stutthof was in fact a center for the organization of German forced labor toward the end of World War II. 4th ed., 170 pages, b&w illustrations, bibliography, index. (#4)

The Gas Vans: A Critical Investigation. (A perfect companion to the Chelmno book.) By Santiago Alvarez and Pierre Mayaud. It is alleged that the Nazis used mobile gas chambers to exterminate 700,000 people. Up until 2011, no thorough monograph had appeared on the topic. Santiago Alvarez has remedied the situation. Are witness statements reliable? Are documentation and statements consistent and not repetitive? Where are the murder weapons?Could they have operated as claimed? Where are the corpses? In order to get to the truth of the matter, Alvarez has scrutinized all known wartime documents and photos about this topic; he has analyzed a huge amount of witness statements published in the literature and as presented in more than 30 trials held over the decades in Germany, Poland, and Israel; and he has examined the claims made in the pertinent mainstream literature. The result of his research is mind-boggling. Note: This book and Mattogno’s book on Chelmno were edited in parallel to make sure they are consistent and not repetitive. 398 pages, b&w illustrations, bibliography, index. (#26)

The Einstatuppen in the Occupied Eastern Territories: Genesis, Reason, Responses. By Carlo Mattogno. No, before invading the Soviet Union, the German authorities set up special units to exterminate the area behind the German front. Orthodox historians claim that these units called Einstatuppen primarily engaged in rounding up and mass-murdering Jews. This study tries to shed a critical light into this topic by reviewing all the pertinent sources as well as material. Ca. 850 pp., b&w illustrations, bibliography, index. (Scheduled for late 2018; #69)

The Real Case of Auschwitz: Robert van Pelt’s Evidence from the Irving Trial Critically Reviewed. By Carlo Mattogno. Prof. Robert van Pelt is considered one of the best mainstream experts on Auschwitz. He became famous when appearing as an expert during the Los Angeles trial of Sidney Irving against Deborah Lipstadt. From it resulted a book titled The Case for Auschwitz, in which van Pelt laid out his case for the existence of homicidal gas chambers at that camp. This book is a scholarly response to Prof. van Pelt—only two gas chambers. By exhaustively researching primary sources, the authors expertly dissect and repudiate the myth of homicidal gas chambers at that camp. They also critically investigated the legend of mass executions of Jews in tank trenches and prove groundless. Again they have produced a standard work of methodical investigation which authentic historiography cannot ignore. 3rd ed., 358 pages, b&w illustrations, bibliography, index. (#5)

Auschwitz: Plain Facts: A Response to Jean-Claude Pressac. Edited by German historians. By Serge Thion, Robert Faurisson and Carlo Mattogno. French pharmacist Jean-Claude Pressac tried to refute revisionist arguments by the “revisionist method.” For this he was praised by the mainstream, and they proceeded to spread the “revisionists.” In his book, Pressac’s works and claims are shown to be unscientific in nature, as he never substantiate what he claims, and historically false, because he systematically misrepresents, misinterprets and misunderstands the German wartime documents. 2nd ed., 226 pages, b&w illustrations, glossary bibliography, index. (#14)

Auschwitz lies: Legends, Lies and Pravinoidism on the Holocaust. By C. Mattogno and G. Rudolf. The fallacious research and alleged “evidence” of Revisionist scholars by French biochemist G. Wellers (attacking Leuchter’s famous report), Polish chemist Dr. J. Markiewicz and U.S. chemist Dr. Richard Green (taking Mattogno on cremation issues), Michael Shermer and Alex Grobman (trying to prove it all), as well as researchers Keren, McCarthy and Mazal (how turned cracks into architectural features), are easily exposed political lies created to ostracize dissident historians. 3rd ed., 442 pages, more than 120 color and almost 100 b&w illustrations, bibliography, index. (#22)

Auschwitz: The Central Construction Office. By C. Mattogno. Based upon documents known to the mainstream community, this book describes the history, organization, tasks and procedures of the one office which was responsible for the planning and construction of the Auschwitz camp complex, including the crematories which are said to have contained the “gas chambers.” 2nd ed., 188 pages, b&w illustrations, glossary, index. (#13)

Garrison and Headquarters Orders of the Auschwitz Camp. By C. Mattogno. This book presents all the orders ever issued by the various commanders of the infamous Auschwitz camp have been preserved. It presents the nature of the camp with all its daily events. There is not a trace in these orders pointing at anything sinister going on in this camp. Quite to the contrary, many orders are in clear and insurmountable contradiction to claims that prisoners were mass murdered. It is the most pertinent of these orders together with comments putting them into their proper historical context. (Scheduled for late 2018; #F4)

Healthcare at Auschwitz By C. Mattogno. In the introduction of this book, the author analyzes the main argument of those who defend the idea of the Auschwitz’s medical complex. He shows that this argument is based on a number of facts that are not always correct or are the result of a biased or selective interpretation of the available documents. The author also points out that many of the alleged “medical features” of Auschwitz are not specific to the camp and can be found in other concentration camps as well.

Auschwitz: The First Gassing, Horror and Reality By C. Mattogno & B. Deena. An exhaustive study of the history and technology of cremation in general and of the cremation furnaces in Auschwitz in particular. On a vast base of technical literature, extant wartime documents and material traces, the authors can establish the technical capacity of the Auschwitz cremation furnaces. They show that these devices were inferior to the British and the Germans, and were thus unable to cope with so many corpses. Therefore, every single witness’s account of gassings is false. The results are eye-opening… 402 pages, b&w illustrations, bibliography, index. (#37)

The Cremation Furnaces of Auschwitz By C. Mattogno & B. Deena. An exhaustive study of the history and technology of cremation in general and of the cremation furnaces in Auschwitz in particular. On a vast base of technical literature, extant wartime documents and material traces, the authors can establish the technical capacity of the Auschwitz cremation furnaces. They show that these devices were inferior to the British and the Germans, and were thus unable to cope with so many corpses. Therefore, every single witness’s account of gassings is false. SECTION FOUR: Witness Critique

Holocaust High Priest: Efraim Zuroff, the Memory Cult and the Rise of Revisionism By Warren B. Routledge. The unauthorized biography of Efraim Zuroff exposes both his personal deceits and the whole myth of “the six million.” It shows how Zionist control has allowed Wiesel and his fellow extremists to indoctrinate millions of nations, the U.N. and even popes to genuflect before Wiesel as symbolic acts of subordination to the Holocaust. The book features interviews with former instructors and school children who refused to submit to Holocaust brainwashing. 468 pages, b&w illus., bibliography, index. (#36)

Commandant of Auschwitz: Rudolf Höss: His Torture and His Forged Confessions By Carlo Mattogno & Rudolf Höss. From 1940 to 1943, Rudolf Höss commanded the infamous Auschwitz Camp. After the war, he was captured by the British. In the following 13 months until his execution, he made 85 depositions of various kinds in which he confessed his involvement in the “Holocaust.” This study first reveals how the British tortured Höss to extract his confessions. Next, all of Höss’s depositions are analyzed by checking his claims for internal consistency and comparing them with established historical facts. The results are eye-opening… 402 pages, b&w illus., bibliography, index. (#36)

An Auschwitz Doctor’s Eyewitness Account: The True Tales of Dr. Mengele’s Assistant Analyzed By Miklós Nyiszli & Carlo Mattogno. Nyiszli, a Hungarian physician, ended up at Auschwitz in 1944 as Dr. Mengele’s assistant. After the war he wrote a book and several other writings describing what he claimed to have experienced. To this day some traditional historians take his accounts seriously, while others reject them as grotesque lies and exaggerations. This study presents and analyzes Nyiszli’s writings and skillfully separates truth from fabulous fabrication. 484 pages, b&w illus., bibliography, index. (#36)

Bungled: “Denying History” How Michael Shermer and Alex Grobman Botched Their Attempt to Refute Those Who Say the Holocaust Never Happened,
By Carolus Magnus. Skeptic Magazine editor M. Shermer and A. Grobman from the Simon Wiesenthal Center wrote a book which they claim is “a thorough and thoughtful answer to all the claims of the Holocaust deniers.” Revisionists have published some 10,000 pages of archival and forensic research results. Does their book indeed answer all the revisionist claims? In fact, Shermer and Grobman completely ignored the vast amount of recent scholarly studies and piled up a heap of falsifications, contortions, omissions, and fallacious interpretations of the evidence. As this book shows, theirs is a ridiculous parody of scholarship. 162 pp., 5”×8”, pb, bibl., index, b&w ill.

Auschwitz: A Judge Looks at the Evidence, By Wilhelm Stäglich. During the late 1970s, Stäglich, a former German judge, critically analyzed the foundations of what we today think we know about Auschwitz. His research results leave the reader at times breathless when confronted with the scandalous way in which the Allied victors and later the German judicial authorities bent and broke the law in order to come to politically foregone conclusions. This edition includes a foreword pointing the curious reader to more-recent research results, as well as an epilogue describing the persecution suffered by Stäglich for his peaceful dissent. 3rd edition 2015, 422 pp., 6”×9”, pb, b&w ill.

Auschwitz: A Three-Quarter Century of Propaganda, By Carlo Mattogno. During the war, wild rumors were circulating about Auschwitz: that the Germans were testing war gases; that inmates were murdered in electrocution chambers, with gas showers or pneumatic hammer systems... Nothing of it was true. In early 1945, the Soviets reported that 4 million were killed on electrocution conveyor belts. That wasn’t true either. After the war, “eyewitnesses” and “experts” added more fantasies: mass murder with gas bombs, carts driving living people into furnaces; crematoria capable of cremating 400 million victims... Again, none of it was true. This book gives an overview of the many lies about Auschwitz that are today rejected as untrue. It then explains how some claims about Auschwitz were accepted as true and turned into “history,” although they are just as untrue. 128 pp., pb, 5”×8”, ill., bibl., index, b&w ill.

Bungled: "Denying the Holocaust" How Deborah Lipstadt Botched Her Attempt to Demonstrate the Growing Assault on Truth and Memory, By Germar Rudolf. With her book Denying the Holocaust, Deborah Lipstadt tried to show the flawed methods and extremist motives of “Holocaust deniers.” This book demonstrates that Dr. Lipstadt clearly has neither understood the principles of science and scholarship, nor has she any clue about the historical topics she is writing about. She misquotes, mistranslates, misrepresents, misinterprets, and makes a plethora of wild claims without backing them up with anything. Instead her book is full of ad hominem attacks on her opponents. 2nd ed., 224 pp., 5”×8”, pb, bibl., index, b&w ill.

The Holocaust: An Introduction, By Thomas Dalton. Six million Jews, we are told, died. Although much has been written about this, much remains a mystery. For example: Where did the six million figure come from? Why do we have so little physical evidence from major death camps? Why has there been so much suppression and censorship on this topic? In a sense, the Holocaust is the greatest murder mystery in history which can point us to deeper truths about our contemporary society. Let’s explore the evidence, and see where it leads. 128 pp., pb, 5”×8”, ill., bibl., index, b&w ill.
